Client-Side Technologies Lab 6
(JavaScript Fundamentals)
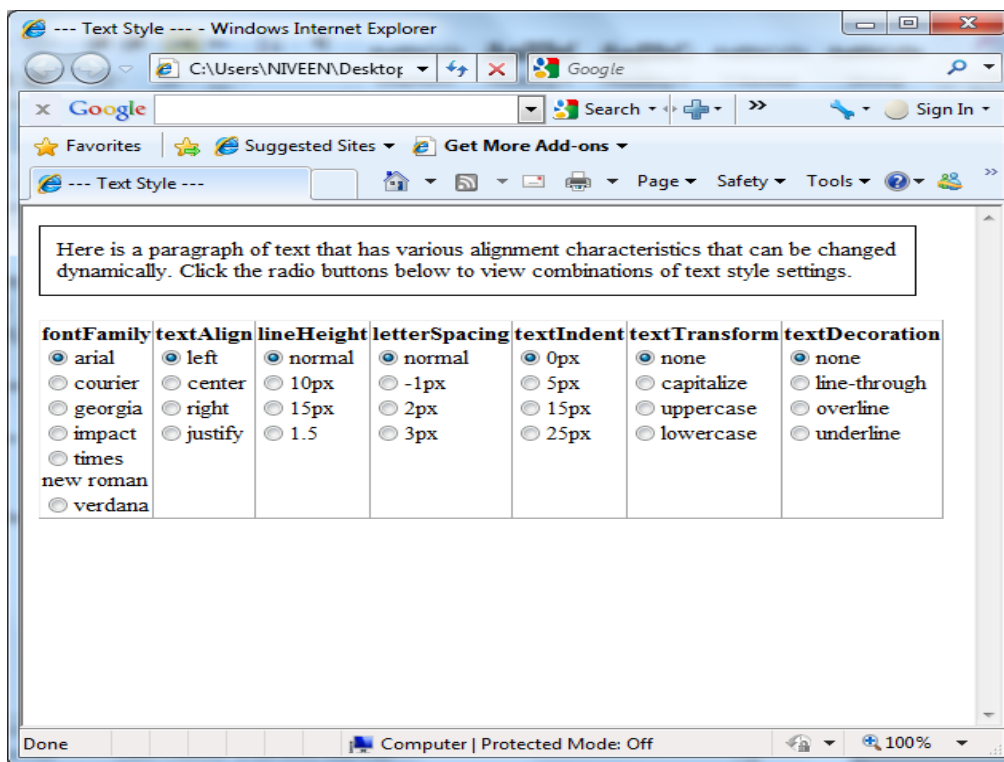

1. Event Object

1.1 Alert ASCII Code of any key pressed; detect whether it is alt key or ctrl key or shift key

1.2 Prevent menu displayed when mouse right click button is clicked by preventing from mouse right click from its action.

2. DOM

2.1 Apply different styles over a paragraph according to checked radio button.

2.2 Given a web document as shown below in Fig. a, with only these few lines of code in shown in Fig. b. Using DOM Nodes to access, create, modify or remove any of its elements to have it finally as shown in Fig. c.

Fig. a

```
<div id="header">

    </div>
    <div id="navigation">
        <ul id="nav">
                Memo
                Articles
                Photos
                About
                Clients
                Contact

    </div>
```
